## EDUCATION

---

### Gujarat Technological University

B.E in Computer Science and Engineering

CGPA: 9.14

Ahmedabad, Gujarat

Expected Graduation, May 2026

### Gujarat Technological University

Diploma in Computer Engineering

CGPA: 9.64

Ahmedabad, Gujarat

Graduated, May 2023

## PROFILE SUMMARY

---

Aspiring Full Stack Developer currently pursuing a Bachelor of Technology, with a Diploma in Engineering completed in 2023. Skilled in building robust and efficient server-side applications using technologies like Node.js, Express, Django, and PostgreSQL.

Experienced in developing RESTful APIs, handling authentication, and working with databases to create scalable backend systems. Strong understanding of data structures, system design, and performance optimization. Passionate about solving real-world problems through clean, maintainable code and eager to contribute to impactful backend development projects.

## PROJECTS

---

### Online Crime Reporting System | Django

Developed a secure web application for citizens to report crimes and monitor case progress.

- Built with Django, REST APIs, and SQLite for efficient data management.
- Implemented features like real-time status updates, geo-tagging of crime scenes, and role-based access control.
- Focused on enhancing transparency and user trust in public safety processes.

### Smart Grading System | Django

- Built using Django and Django Templates with a structured content flow (Subjects → Chapters → Topics).
- Integrated Razorpay payment gateway to manage paid subscriptions and premium content access.
- Implemented secure authentication, email verification, and subscription expiry automation.
- Enforced access-controlled PDF viewing to restrict study materials to subscribed users.

### Medium Clone | MERN

Created a full-stack content publishing platform inspired by Medium.

- Developed using Node.js, Express, React, and PostgreSQL with JWT-based authentication.
- Implemented features for user registration, login, article creation, editing, and persistent user sessions.
- Designed responsive UI and ensured smooth data flow between frontend and backend.

## ACADEMIC ACHEIVEMENTS

---

### Hackout'24 – DAIICT (2024)

Developed **AgriGear Exchange**, a Django-based farm equipment rental marketplace during Hackout'24.

- Implemented core features such as authentication, listings and booking.
- Advanced to Round 2 among several competitive teams.

### AU Hackathon 2025

Participated in AU Hackathon 2025 and built **FinFlow**, a fintech dashboard for visualizing transactions and managing finances.

- Developed using full-stack technologies focused on backend architecture.
- Qualified among the **top 25 teams out of 100**, showcasing innovation and teamwork.

### Crash Course on Python – Google

Completed a 20-hour course covering Python fundamentals, data structures, OOP, and automation scripting.

## SKILLS

---

Backend Development: Node.js, Express.js, Django, REST APIs, JWT Authentication, Database Design, MVC Architecture

Frontend Development: React.js, HTML, CSS, JavaScript, Tailwind CSS, Bootstrap
